SAVILE ROW, LONDON, BESPOKE TAILORS

## Care Guidelines

- Pockets, lapels and collars should be brushed frequently to remove dirt.
- Stains should be blotted immediately and not rubbed.
- Creased garments recover well in a humid environment. Hang them somewhere damp and warm, such as a bathroom, or vaporise them lightly with water.
- After use, allow your suit to rest, wearing the suit for two days in succession can cause damage to the fibres.
- To help maintain the shape of your suit always hang your jacket on an appropriate hanger that supports the shoulders and always hang your trousers vertically.
- Avoid placing items in your pockets as this puts strain on the seams.
- Unbutton your suit before you sit down to avoid pulling.
- Store your suit in a breathable garment bag for protection.
- Have your suit dry cleaned at least once a season, however excessive dry cleaning can reduce the life of a suit.
